UPA-100

# Is it **SAFE** to open YOUR panel?

Find out **FIRST** with either  
UPA-130 or UPA-100  
Power Alerts

- **Detects Stored Energy**
- **Reduces Arc Flash & Electrocution Risk**
- **Enhances NPA 70E & OSHA Compliance**

The UPA Power Alerts reduces the risk of electrical arc flash by pre-verifying the electrical isolation from outside of a control panel. Hardwired to the circuit breaker or main disconnect, the UPA LED's flash to indicate the presence of hazardous conditions (40- 750 VAC & 30-1000 VDC) associated with stored energy. Engineered with redundant circuitry, the Power Alert is powered by the same voltage that it indicates.

Available in 2 sizes, the easy to install UPA's fit through standard push-button and conduit knockouts.

If safety is a priority and concern in your plant, for only \$105.00 you can't afford to be without this product.
